Healthy Cities & Communities Short Course

Venue: Flinders University, Adelaide, SA

This course is run through the Department of Public Health at Flinders University, Adelaide in conjunction with the Noarlunga Healthy Cities Project and the SA Community Health Research Unit led by Professor Fran Baum.

UNIVERSITY

ADELAIDE AUSTRALIA

Topics covered include:

- Healthy Settings Approach to Health Promotion
- Community Participation
- Collaboration Across Sectors
- Local Government and Health Promotion
- Evaluation

- Planning and Needs Assessment for Health Promotion
- Project Implementation
- Managing Change
- Site Visit to Noarlunga Healthy Cities
- Environmental Sustainability and Health Promotion

Flinders University recognises that Healthy Cities is not just an issue for public health professionals. That's why each year the Department offers its comprehensive Healthy Cities program (a component of its Masters of Primary Health Care degree) as a specialised, five-day short course to professionals from a range of backgrounds, including urban planners, environmental health officers, teachers, public policy and planning officers, public health practitioners and community development officers as well as hospital agency and community based health workers.

The course provides a critical understanding of concepts behind, and practices associated with, Healthy Cities and similar projects in Australia, South East Asia and overseas, such as Healthy Worksites, Healthy Schools, Healthy Hospitals and Local Agenda 21.
